

Water Talks 2023

WATER in the Home

The third of four 'Water Talks' in April and May

Wednesday 17th May

Adrian Pickering

Adrian is a retired engineer with experience in both the private sector and, in particular, within academia. Importantly, he is also the owner of a nationally-registered 'SuperHome' where he has implemented a range of solutions – both active and passive – to reduce environmental impact.

With this, the 3rd of the four 'Water Talks', we move from a *garden* setting to a *home* setting where Adrian is keen to share his first-hand experiences of implementing well-engineered solutions.

His talk includes the following:-

- The water we use and why
- Where our water comes from
- Once 'used' where does our water go
- Water/energy saving and why
- Alternative 'reuse' sources
- Legalities
- Real examples:- rainwater and ground water
- 'Grey' water issues
- A Roadmap for action

Some real home systems will be discussed and may encourage you to take action.

This talk is free and open to the public. The talk is funded by a local resident and provided under the auspices of Transition Southampton. *There's no need to book – just turn-up.* The talk is 6:50pm for a 7:00pm start. *Look forward to seeing you there at:-*

The Lounge, Highfield Church Centre, Highfield, Southampton, SO17 1RL
